列表

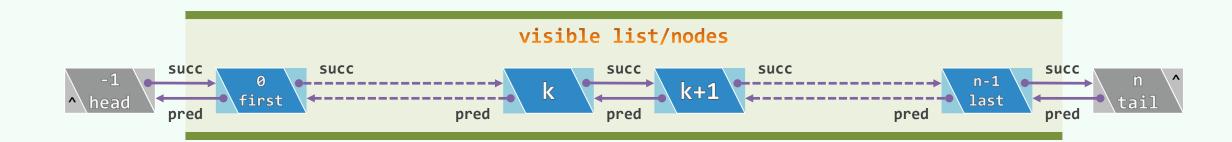

无序列表: 遍历

八戒道:不要扯,等我一家,吃将来

traverse(): 函数指针/函数对象

```
template <typename T> void <u>List<T>::traverse( void ( * visit )( T & ) )</u>
{ for( <u>NodePosi<T> p = head->succ; p != tail; p = p->succ ) visit( p->data ); }</u>
```

```
template <typename T> template <typename VST> void <u>List</u><T>::<u>traverse( VST & visit )</u>
{ for( <u>NodePosi</u><T> p = head->succ; p != tail; p = p->succ ) visit( p->data ); }
```
